

Pipe Support Applications

truss structures

- Proven history with installed pipe support and material handling systems
- Prefabricated structures install quickly with less on-site equipment and less waste
- Durable products manufactured and installed to the industry's highest specifications
- Clear spans from 5'-0" to 250'-0"
- Total site solutions provided with extensive technical support

Attached Utilities – piping or utilities can be attached below or on the side of a vehicular or pedestrian structure

Elevated Structures - designed to meet project owners' clearance requirements

Dual Applications – pipe support structures may also provide necessary pedestrian walkways

Long Span Solutions – single truss pieces can be combined to span large areas or waterways

Multiple Structures – support 72" diameter pipes carrying extreme temperature liquids at a nuclear facility
