

# INDUSTRIAL APPLICATIONS

- Heavy loading capacity
- Fast installation
- Low initial cost
- Long life cycle
- Extensive technical support

**Pipe Support** – truss structures offer pipe support solutions, with a variety of custom designs and sizes available

**Heavy Loading** – truss structures can accommodate heavy loads for construction or emergency vehicles

**Refinery Solutions** – plate and precast structures can support roadways while maintaining access to pipes or utilities

**Mining Applications** – plate structures have been utilized to extend and improve mine entrances, providing protection from falling rocks and debris. MULTI-PLATE structures are widely used for aggregate tunnels and utility conduit.

**Discharge Structures** – durable precast structures transport pumped waters and provide protection during harsh weather conditions
