ROADWAY & BRIDGES

- Lower initial cost
- Long life cycle
- Attractive appearance
- Clear spans, multiple rises
- Extensive technical support

Guardrail applications – functional and aesthetic guardrail applications can be applied to the headwall

Vehicular stream crossing – versatile application offering easy maintenance of traffic above and below the structure

Development entrance – part of city’s revitalization project, providing vehicular access to main facilities

Highway overpass – increase rise for greater clearance in underpass structures and drainage structures

Multiple cells – span length increased with side-by-side installation of precast cells
