

MOBILE PIPE®

Contech Engineered Solutions' MOBILE PIPE® modular mill can be delivered to remote site locations on trucks and assembled on-site for fast and cost effective on-site steel pipe manufacturing. The MOBILE PIPE modular mill is designed to be a self-supporting factory that can be quickly deployed and put into production. Once on-site, pipe manufacturing progresses quickly enough to allow pipe installation within four hours.

The MOBILE PIPE modular mill is ideal for:

- Remote Jobs
- Projects requiring large continuous pipe production (windmill foundation forms, vertical shafts, caissons)
- Support for natural disasters where immediate deployment and rebuilding is necessary
- Sites with limited storage space or restricted access

The MOBILE PIPE modular mill can produce corrugated metal pipe in a variety of sizes. Diameters from 3 to 16 feet and lengths up to 35 feet can be accommodated. This pipe meets the same levels of quality construction as does all Contech manufactured pipe, with high coil feedrate speeds and the same lock-seam edge process used in conventional pipe manufacturing.

The MOBILE PIPE is a modular mill which can be moved via truck, train or ship. For more information, call toll free: 800-338-1122.
