

PLATE	PRODUCT	SPAN RANGE	FEATURES & BENEFITS
	MULTI-PLATE [®] & Aluminum Structural Plate (MP & ALSP)	5' to 26'	• Long history of strength, durability and economy • Variety of sizes and shapes available • Prefabrication of parts allows for fast & easy installation • Ideal structures for rehabilitation and relining
	Steel & Aluminum Box Culverts	8'-9" to 45'	
	BridgeCor [®] , SUPER-SPAN [™] & SUPER-PLATE [®]	18' to 65'	
	Bridge Plank	2' to 5'-10" (net span between bridge stringers)	• Economical solution for bridge deck rehabilitation and new construction
PRECAST			
	CON/SPAN [®] Bridge Systems O-Series [®] & B-Series	12' to 65'	• Fully engineered, modular systems • Precast arch units, head & wingwalls for fast installation • Clear span, three-sided structures provide natural bottom for environmental applications
	BEBO [®] Arch Systems	12' to 102'	
	EXPRESS [®] Foundations	N/A	• Foundation blends the speed of precast with the economy of cast-in-place • Pick weights and sizes customized to your equipment
TRUSS			
	Steadfast [®]	Vehicular 10' to 200'	• Selection of standard truss styles available, in addition to custom capabilities • Variety of finish, decking and rail options for each project • Prefabricated structure for ease of installation • AISC Major Bridge Certified • 35-year warranty for galvanized vehicular bridges
	Continental [®] Bridges	Pedestrian 10' to 300'	
	Continental [®] EXPRESS [®] Bridges	Pedestrian 20' to 180'	• Connector[®] style & weather steel finish • AISC Major Bridge Certified • 10-year limited warranty • Bridge drawing within 5 business days & bridge delivery within 6-8 weeks of approved drawing

WALLS/ ABUTMENTS	PRODUCT	APPLICATION	FEATURES & BENEFITS
 	Anchored Wall System	Retaining walls & wing-walls for Plate, Precast & Truss structures	• Reduces foundation size compared to cast-in-place cantilever walls • Limits backfill and excavation area • Saves valuable on-site time and resources
	RigidWall™		
	RigidWall™	Pedestal Walls	• Shortens bridge span requirements and eliminates need for dual systems to support loads and retain fills
	Anchored Wall System RigidWall™	Abutments for Truss Structures, Beam Bridges (pre-stressed or steel)	• Rapid installation • Patented system supports vehicular or pedestrian truss structures • Quality decorative finishes available
	Bin-Wall™	Headwalls, Wingwalls, Grade Separation	• Sturdy and lightweight • Bolted together for easy installation

HARD ARMOR	PRODUCT	APPLICATION	FEATURES & BENEFITS
	A-Jacks®	Stream/Wetlands Restoration, Abutments & Bridge Piers	• Cost effective alternative to conventional hard armor methods for scour counter measure
	ArmorFlex®	Channel Lining, Dam Overtopping	• Aesthetic, functional and easy to install using conventional construction equipment

PILE & SHEETING	PRODUCT	APPLICATION	FEATURES & BENEFITS
	Metric Sheeting, Anchor Wall™, HEL-COR® Pile Shell, Liner Plate, Signal Guard, Vinyl Sheeting	Wingwalls, Shore protection, Trench protection, Ditch Checks, Jetties & Lagoon Baffles	• Expedites work, reduces cost and provides many types of temporary and permanent structures
