

## Secondary Containment System

# EZ-Loc™ Containment

A secondary containment system provides an essential line of defense in the event of a failure of a primary liquid containment system, such as a bulk storage container, mobile container, pipes or other liquid-filled operational storage.

Contech Engineered Solutions provides a unique, patent-pending solution with a slide and lock wedge-design. The EZ-Loc™ is secondary containment system that is a fast, bolt-free assembly process for simple on-site installs. In addition, the unique mobility allows you to take it wherever the job takes you!

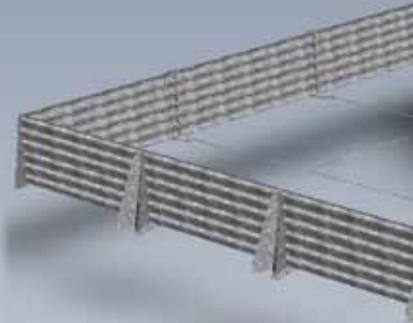

Panel Assembly Detail

Lock Pin-Design Close-Up

**Assembles faster than any similar system in the industry!**

## System Features & Options

### Dimensions

- Standard height - 36"
- Configurable lengths based on standard length panels of 4', 8' and 16'
- 16-Gage Panels
- Weight per linear foot - 5 lb

### Material

- Galvanized Steel Components
- Locking Pins
- Aluminum Edge Trim

### Compatible Liners

- Spray-On
- HDPE Liners

## Preparation & Assembly Considerations

- Most individual systems will arrive on only one or two standard shipping pallets along with complete assembly instructions.
- Surface area at system location must be properly prepped before installation.
- Approximately 80 seconds per joint. A 32' x 32' system can be completely assembled within one hour by a three-man crew.
- No special equipment necessary.

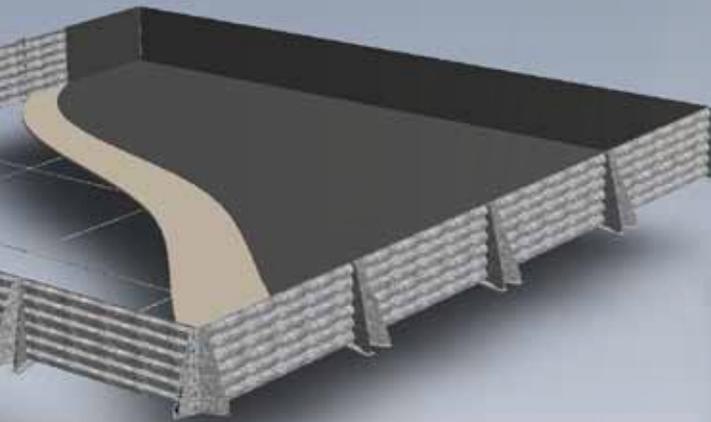

## Advantages of the EZ-Loc™ Containment System

Introducing Contech's **EZ-Loc™ Containment System** – an innovative, secondary containment unit that assembles faster than any other system in the industry.

This advanced secondary containment system requires no bolts – just a revolutionary slide and lock pin-design. A two to three man crew can easily set up within hours allowing them to move on to the next jobsite.

- Bolt-free design
- Simple assembly and above-ground installation for active measures of secondary containment
- No power tools required in assembly
- Durable, galvanized steel finish
- Scalable for various site-constraints - helping to maintain your project containment requirement
- Minimal ground disturbance
- Reusable

**Contech Engineered Solutions** is the nation's leading provider of site solution products and services for site development. Contech's product portfolio includes bridges, drainage, retaining walls, sanitary sewer, stormwater, erosion control, wastewater treatment and soil stabilization solutions.

Contech provides a variety of heavy duty solutions to serve the mining, oil and gas, alternative energy and forestry industries. Based on more than a century of research and practical field experience, we understand your natural resource needs and our solutions are designed to provide practical, efficient and economical results.
